GTA Announces GB-OS Patch Release 5.4.3

Contact: Monika Baumann, (407) 380-0220, mbaumann@gta.com

ORLANDO, FL • January 19, 2012 — Global Technology Associates, Inc announced today the release of GB-OS 5.4 patch level 3 (version 5.4.3). This OS patch release includes minor enhancements and addresses issues identified since the release of GB-OS 5.4.2. Full release notes may be reviewed by visiting the GTA Web site at www.gta.com.

GB-OS patch release 5.4.3 features updates to the routing engine and SSL Client service, as well as configuration verification and web interface improvements. GB-OS 5.4.3 includes an important update to support inefficient 1-byte packets sent by some internet browsers. Additional minor fixes for the web interface and firewall services have also been implemented in this patch release.

Effective January 19, 2012, GB-OS 5.4.3 will be available for download via the GB-OS Web interface or through the GTA Online Support Center to existing GTA customers with a GTA support contract or annual maintenance agreement. Other users should contact their local GTA Channel Partner or email sales@gta.com for information and pricing of GB-OS 5.4.3 upgrade options.

Global Technology Associates, Inc., is a world leader in cost-effective network security solutions. Founded in 1992 by software engineers, GTA has been delivering quality software solutions for the past 20 years. GTA products include firewall and VPN appliances and firewall and VPN system software, mail and web security options, and monitoring and reporting tools. Headquartered in Orlando, Florida, the privately held company has been the developer of firewalls that lead the market in price and performance.
